

Level 0

User: bandit0

Password: bandit0

SSH login as badit0:

```
ssh login0@bandit.labs.overthewire.org -p 2220
```

Looking for readme file:

```
ls -l
```

Viewing readme file

```
cat readme
```

Additional notes:

`file <filename>` - returns type of given file,
example output: `readme: ASCII text`

`du <filename>` - returns estimated file size (default in Bytes)
example output: `4 readme`

`find <filename>` - searches for file name,
example output: `readme` (because we are in it's directory)
